Operating System	Recommended
Windows XP Professional, Home Edition (SP 3)*	Minimum: Pentium III 700MHz or faster, 256 MB of RAM, 1024x768 or higher resolution video adapter and display, DVD drive Recommended: Pentium III 700MHz or faster, 2 GB of RAM, 1024x768 or higher resolution video adapter and display, DVD drive
Mac OS X v10.6*	Minimum: Intel-based Mac, 1 GB of RAM, DVD Recommended: Intel-based Mac, 2 GB of RAM, DVD

Microsoft Windows Server 2003 or Windows Server 2008 Terminal Services

The clients listed below are supported by FileMaker, Inc. at this time. Other clients may work as expected but they have not been tested for use with FileMaker Pro and are not currently supported.

- Windows: Terminal Services Client (Remote Desktop Connection) version 6.0.6001 (Microsoft XP) or version 6.0.6000 (Microsoft Vista) running in Internet Explorer version 7.0.5730.11

Compatibility

FileMaker Pro 11 databases use the same file format (.fp7) as FileMaker Pro 10, 9, 8.5 and 8. Therefore databases can easily be shared between these versions.

Networking:

TCP/IP: limited to nine simultaneous FileMaker client connections; each client requires a licensed copy of the FileMaker Pro software; see FileMaker Server 11 for increased capacity. FileMaker Pro 11 supports Internet Protocol Version 6 (IPv6) addresses, as well as IPv4 addresses.

Any computer accessing FileMaker Pro files over a network will need to have a licensed installation of versions 8.x, 9, 10 or 11 of FileMaker Pro or FileMaker Pro Advanced. FileMaker Pro 7 and FileMaker Developer 7 use the same file format as FileMaker Pro 10/Pro 10 Advanced but are no longer supported due to product obsolescence.
