Conversion Details

from TIMS Software *to* HearForm

HearForm offers a time saving Conversion Service, transferring limited Data

From TIMS

.....

To HearForm

Converting Your Data from Tims Software to HearForm Software

ONE TIME CONVERSION FEE: \$315.00

HearForm can save much of your data from TIMS Software. After receiving your data, we import that data into the matching fields within HearForm Software. After importing, you will immediately be able to use your data within the new system.

We save as much of your information as possible, but TIMS does not make it easy for others to export the data from their system. That limitation does reduce the full amount of data that we can receive. If you need data that is not listed below, please discuss that need with us. We are not able to import Audiometric Data, Financial Transactions or the Scheduled Appointments.

The following Fields *can* be Saved and Exported from TIMS Software

Basic Demographics	Name First	Gender
Record Number	Name Middle	Social Security
Assigned Clinician	Name Last	Marital Status
Patient Type	Account #	Misc Data1 & 2
Patient Status	Date of Birth	Email Address
